

Herzberg Two Factor Theory applied to Games-as-a-Service

GDC Online 2012 — Steve Gaffney, Armin Ronacher
Fireteam Ltd – <http://fireteam.net/>

Who am I

- ▶ Armin Ronacher
- ▶ Software Engineer at Fireteam
- ▶ Multiplayer Fanatic
- ▶ Open Source Evangelist
- ▶ Not a Psychologist

Who are We?

- ▶ We do Online Services
- ▶ Spin-off from Splash Damage, a multiplayer focused Studio
- ▶ Not Psychologists

Games as a Service

- ▶ Continuous revenue from existing player base
- ▶ Primarily multiplayer (but not necessarily competitive)
- ▶ But not necessarily multiplayer
- ▶ Keep the player engaged with the game

Mirror of Human Behavior

- ▶ People exhibit largely the same behavior in game they do in their every day lives
- ▶ Practical example: Valve's Exploration of Economics
- ▶ With a game as a service you can feed back alterations and evaluate the result

Who is Herzberg?

- ▶ Frederick Herzberg
- ▶ Lectured at University of Utah

Herzberg's Two Factor Theory

- ▶ Humans have two basic needs:
 - ▶ **As animals:** avoid pain
 - ▶ **As persons:** act and grow psychologically

Herzberg's Two Factor Theory

▶ Hygiene Factors

- ▶ Working Conditions
- ▶ Pay
- ▶ Human Relations
- ▶ Company Policy

▶ Motivation Factors

- ▶ Achievement
- ▶ Advancement/Growth
- ▶ Recognition
- ▶ Nature of Work
- ▶ Responsibility

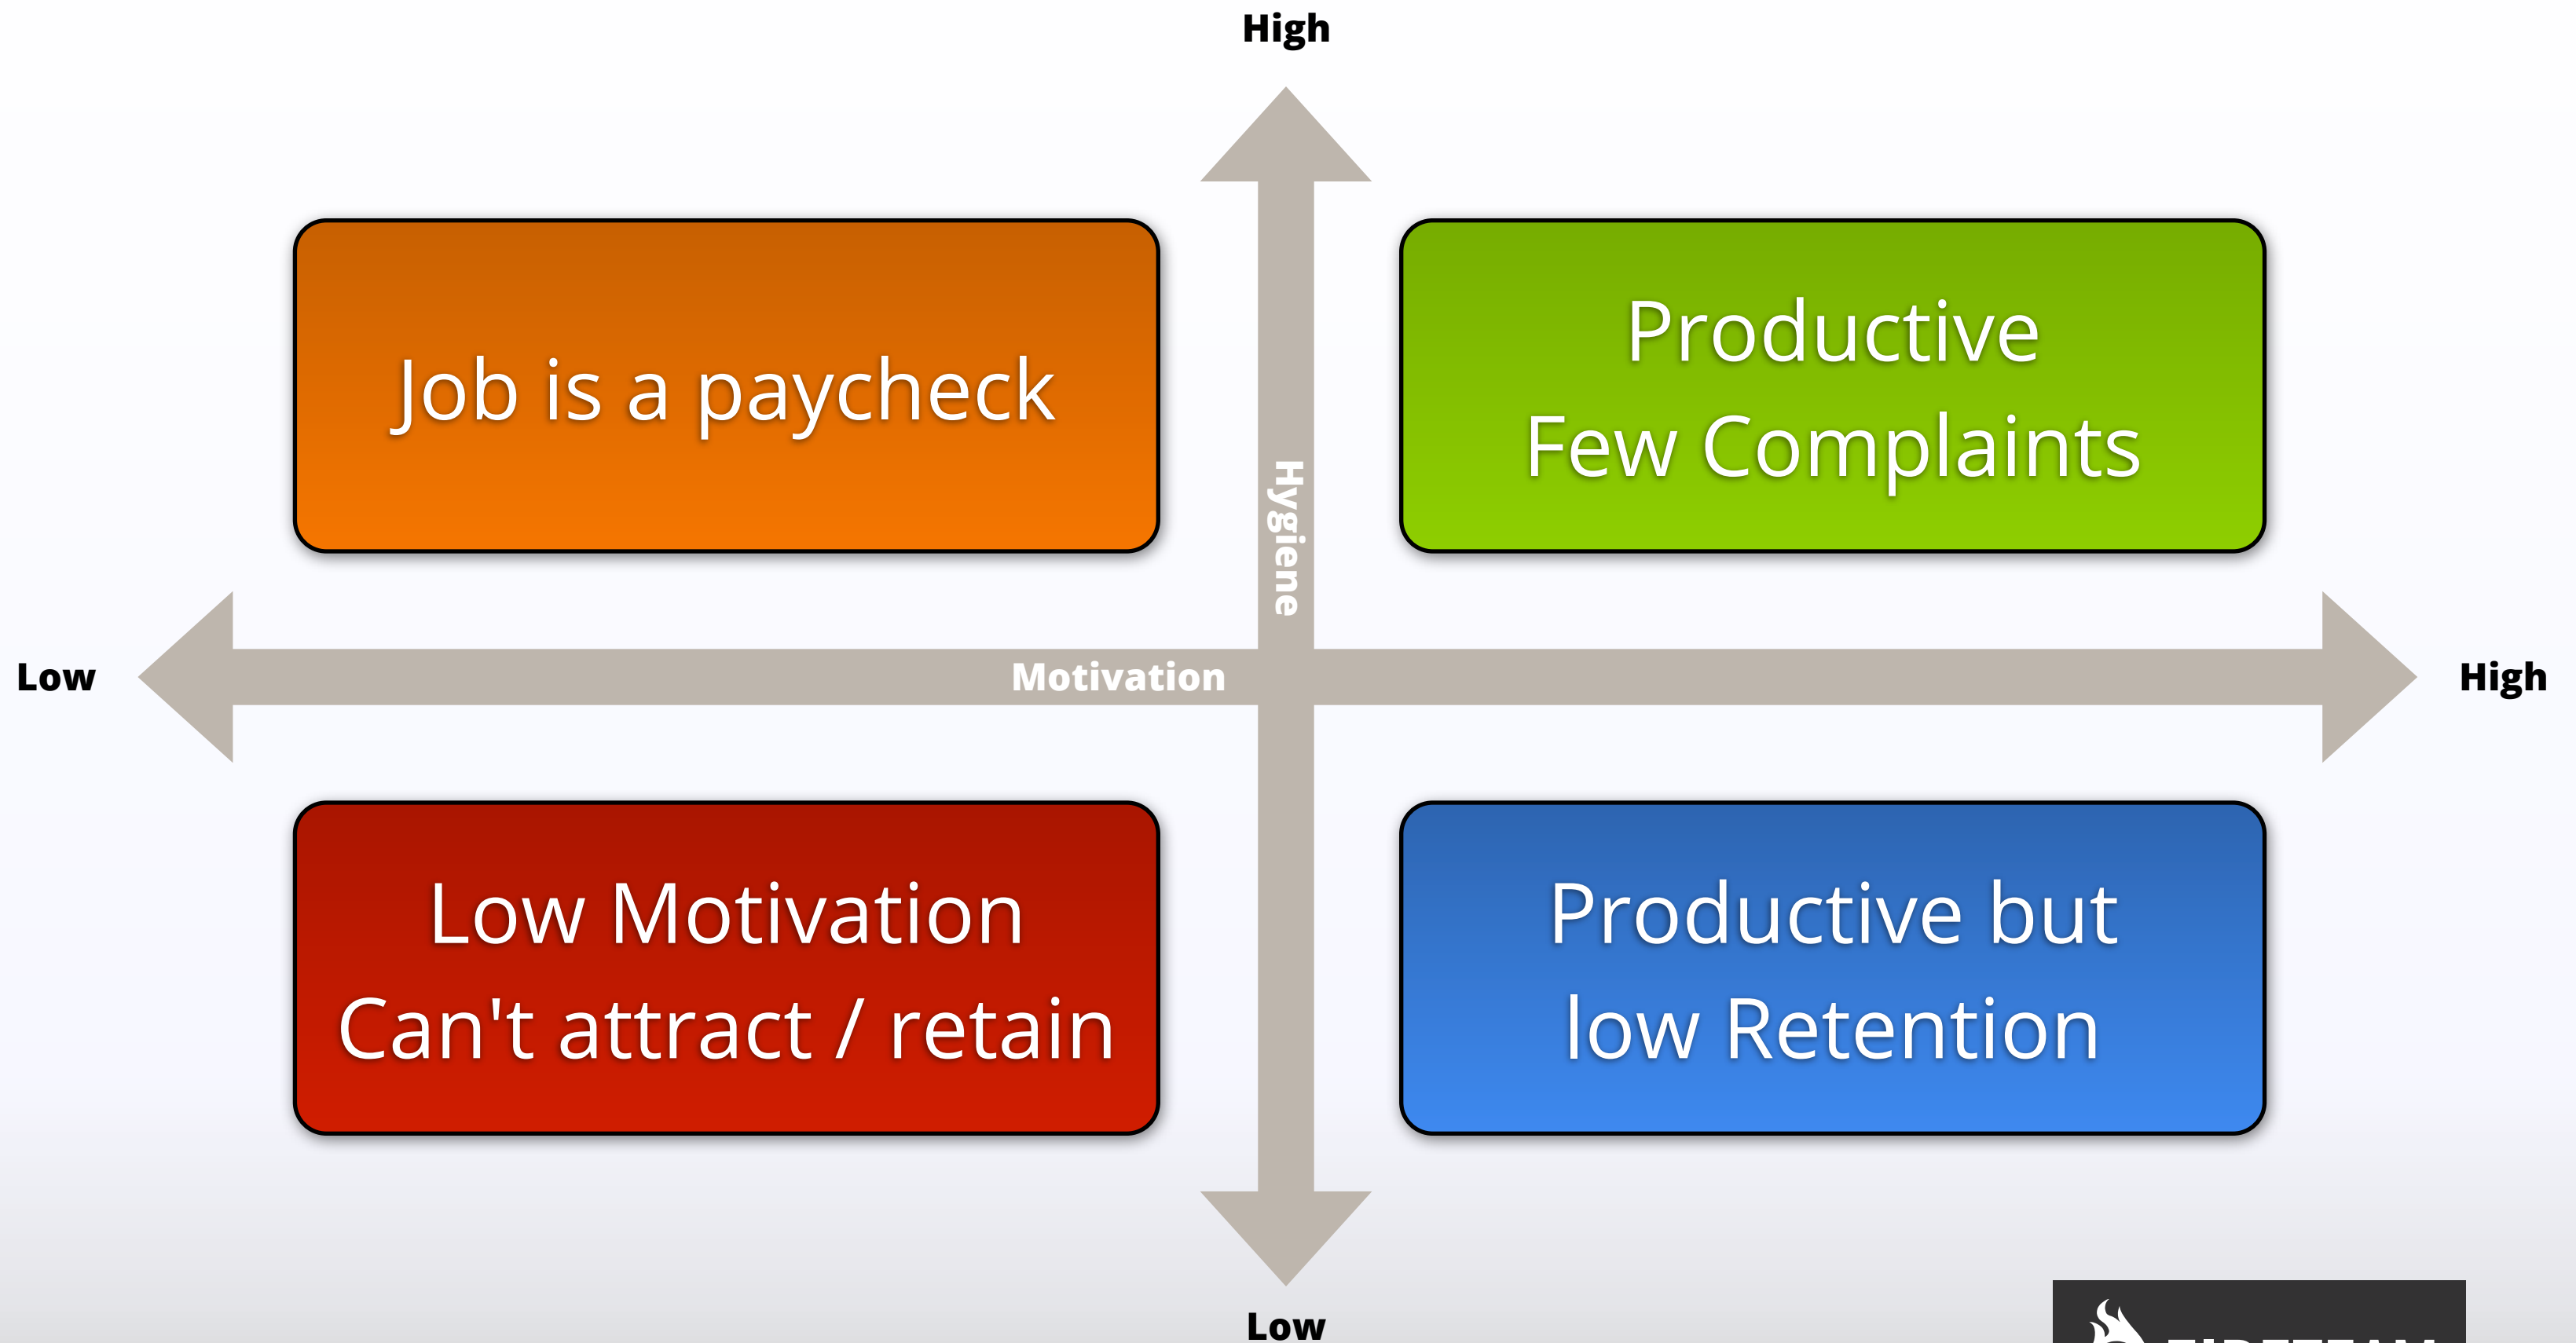

Absence of Hygiene Factors

- ▶ Lower Productivity
- ▶ Complaints
- ▶ Absenteeism
- ▶ High turnover rate
- ▶ Lack of higher level motivation

Absence of Motivation Factors

- ▶ Stagnation
- ▶ Low retention

What does any of this have to do with Games?

... and how do we know it applies?

Game Analogy

- ▶ Hygiene = Health
- ▶ Motivators = Mana

- ▶ Two independent resources, both are required

Health

Mana

= "I give up"

Health

Mana

= nowhere to go

Health

Mana

= ineffective

Health

Mana

=

Nature of the Game

is it really fun?

DayZ

Dota 2

Call of Duty (Modern Warfare 2)

Eve Online

World of Warcraft

Senior Sergeant Screwed
«W N M»

Senior Sergeant Screwed
«W N M»

Games are not Fun

Most games we play we don't play because they are fun

So why do we go back?

What motivates us playing such games then

Too Long; Didn't Read

- ▶ Why play people games?
 - ▶ Direct feedback on success and failure
 - ▶ Recognizable growth
 - ▶ Sense of achievement
 - ▶ Possibility of Mastery

Work = Play = Activity

There is not that much of a difference

Let's apply Herzberg to Games

Motivation in Games

Motivation at Work

- ▶ Achievement
- ▶ Advancement/Growth
- ▶ Recognition
- ▶ Nature of Work
- ▶ Responsibility

Motivation in Games

- ▶ Achievement
- ▶ Advancement/Growth
- ▶ Recognition
- ▶ Nature of Play
- ▶ Responsibility

Achievement in Games

Turning it Around

SHOP

Advancement, Growth, Mastery

- ▶ Unlockables / Levels
- ▶ Easy to pick up, hard to master
- ▶ Exploration of unintended game mechanics

Recognition

- ▶ Other's recognize your achievements
- ▶ **Achievements in the game:**
 - ▶ Abilities others can witness
 - ▶ Montage videos
- ▶ **Achievements in the meta game:**
 - ▶ Trophies, XBox/Steam Achievements

Nature of Play

Provided motivators

Responsibility

“My team sucks”

Responsibility

“I am part of this game's success!”

Hygiene Factors in Games

Hygiene at Work

- ▶ Hygiene Factors
 - ▶ Working Conditions
 - ▶ Pay
 - ▶ Human Relations
 - ▶ Company Policy

Hygiene in Games

- ▶ Hygiene Factors
 - ▶ Online Experience
 - ▶ Rewards
 - ▶ Gamer Relations
 - ▶ Developer/Publisher Policy

Online Experience

- ▶ **Negative factors:**
 - ▶ Latency issues
 - ▶ Server load issues

Rewards = Pay = KITA

- ▶ Kick
- ▶ in
- ▶ the
- ▶ Ass

Carrot and Stick

- ▶ **Negative:** the stick
- ▶ **Positive:** the carrot

KITA in Games

- ▶ World of Warcraft: grind
- ▶ Diablo 3: grind
- ▶ Call of Duty: grind

- ▶ Counter Strike: in-session power growth
- ▶ Dota 2: in-session power growth, random rewards
- ▶ Team Fortress 2: random rewards

Relationship with Operator

Do you appreciate me as a customer?

Relationship with Operator

- ▶ Do you take advantage of me?
- ▶ Am I being listened to?
- ▶ Do you care what I think?
- ▶ Are you going to give us players what we want?
- ▶ Why are you nerfing this gun?
- ▶ Do you keep my data secure?

Relationship with Gamers

Human relationships are best two-way

Relationship with Gamers

- ▶ Recognize the community
- ▶ Act on griefers and cheaters
- ▶ Control anti-social behavior

Meta Game

- ▶ People engage with the game outside of the game
- ▶ Discussing strategies, creating art, sharing experiences
- ▶ With a good relationship that does not have to be enforced
- ▶ Players are glad to become part of the game and provide the missing bits and pieces

Iteration

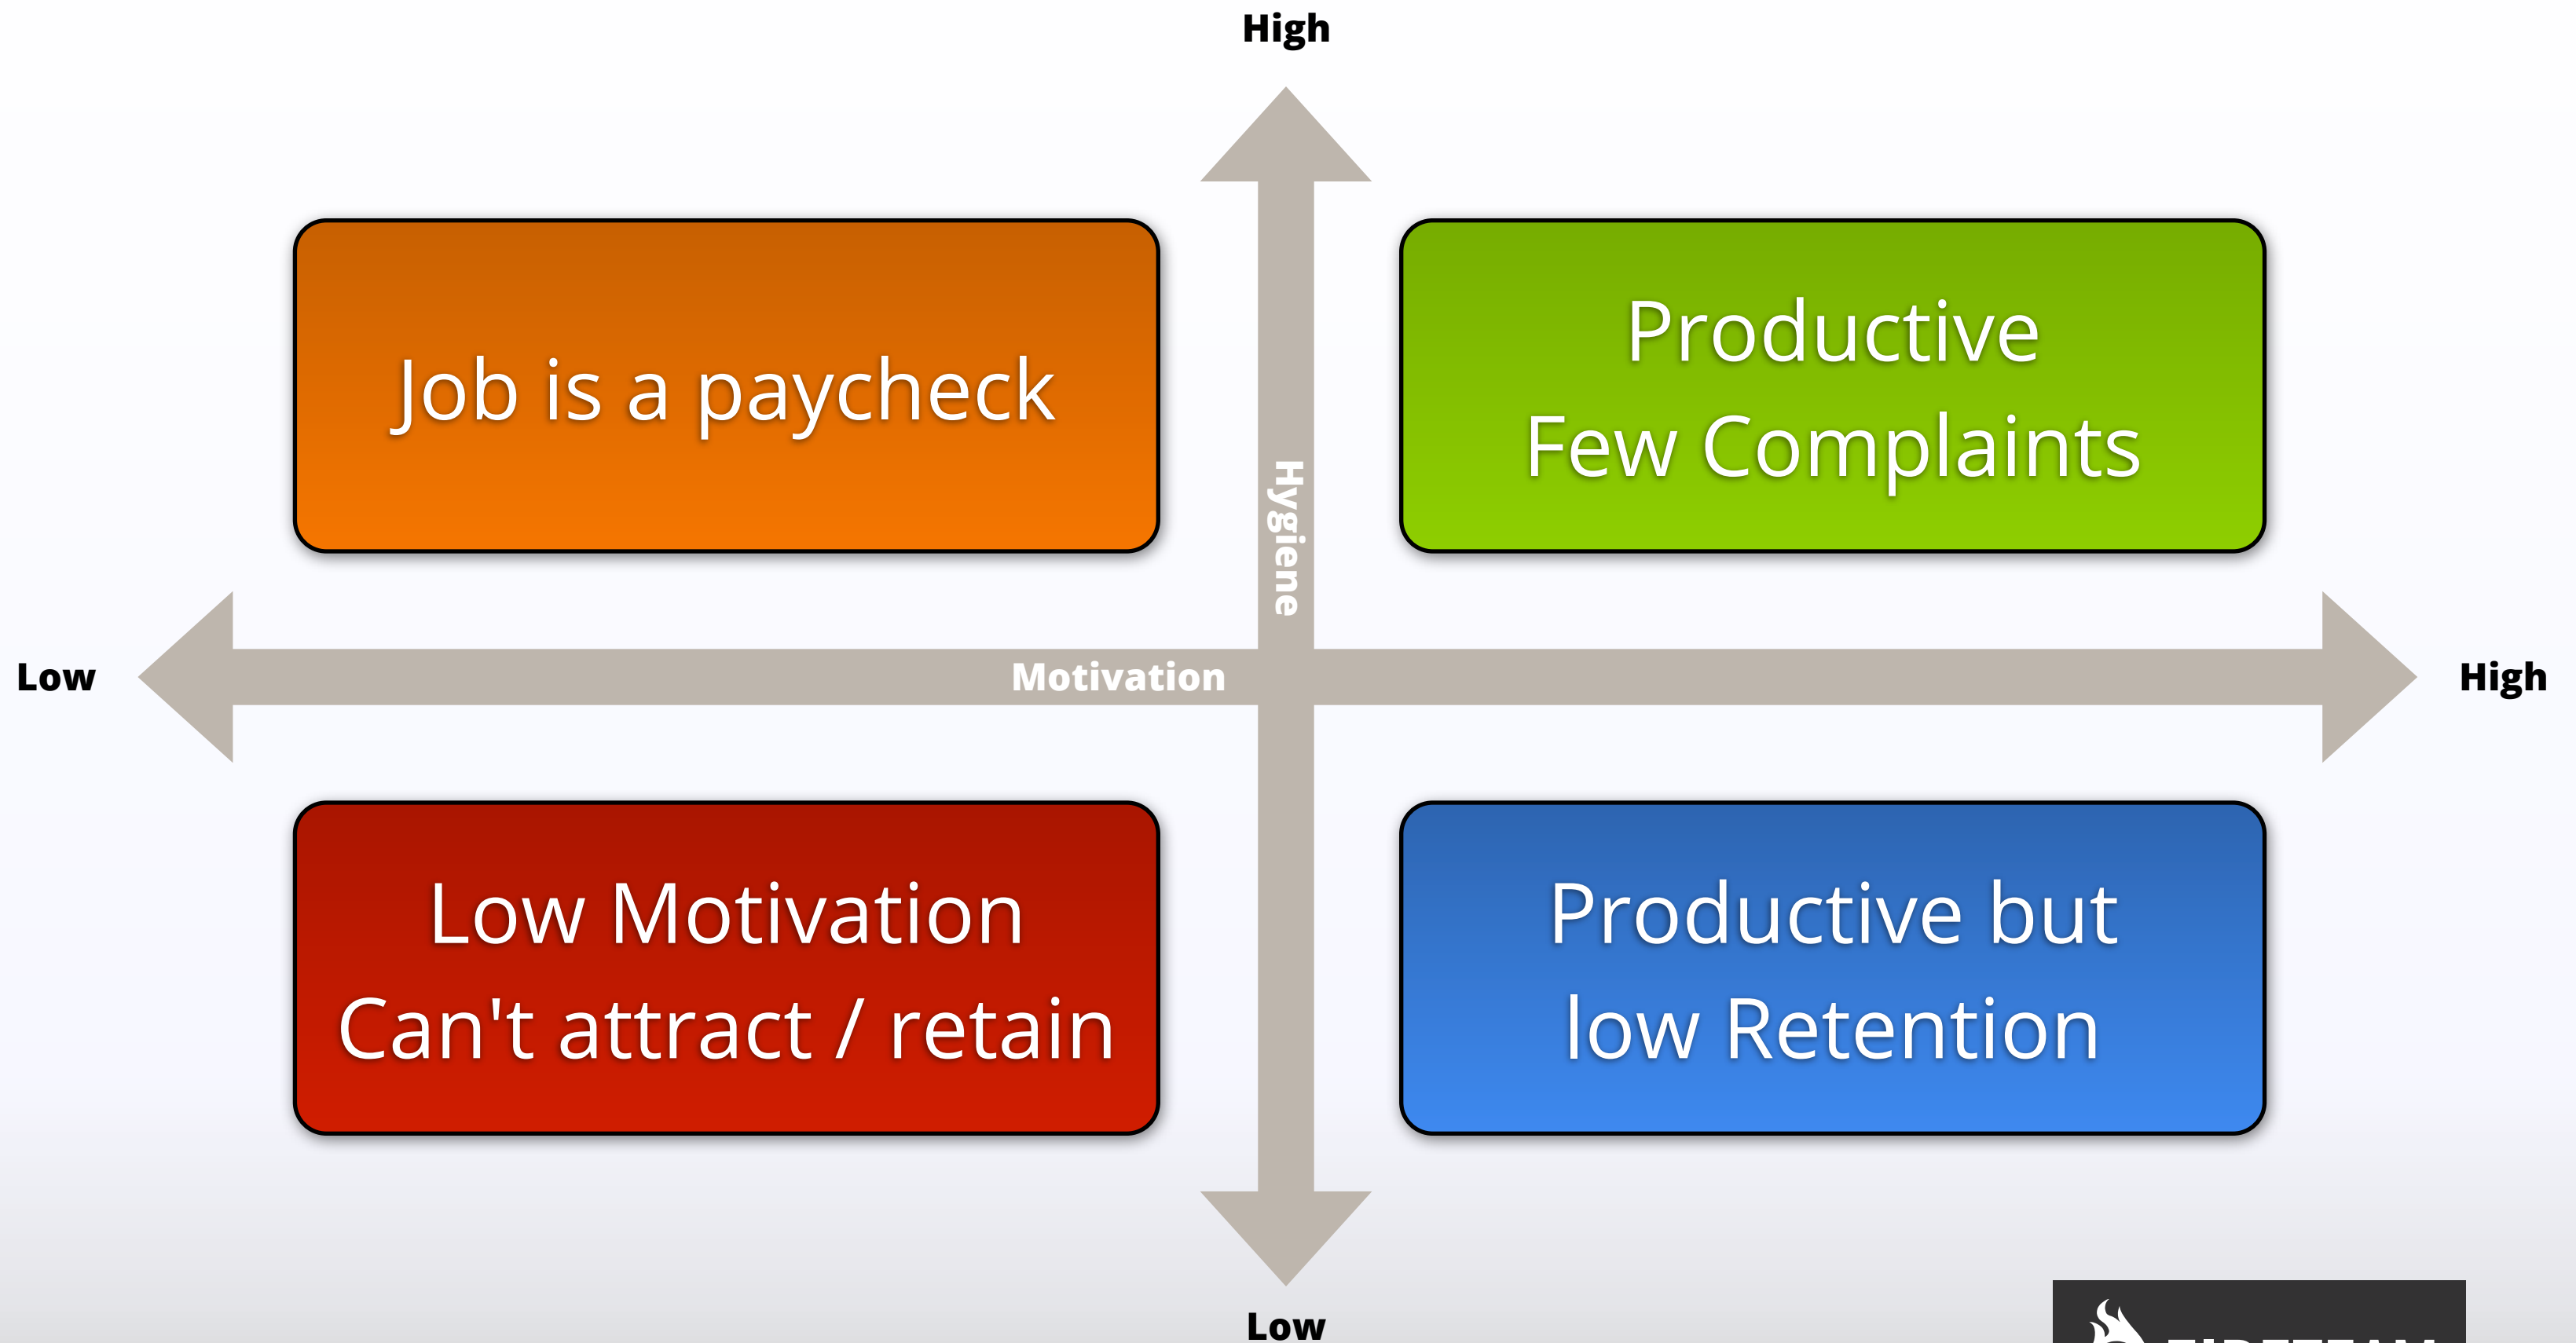

- ▶ How often is the game patched?
- ▶ Dota 2: bug in patch that allowed an invulnerable unit to be used as ally.
- ▶ Fixed 4 hours later — faster than the larger community was to actually exploit it.

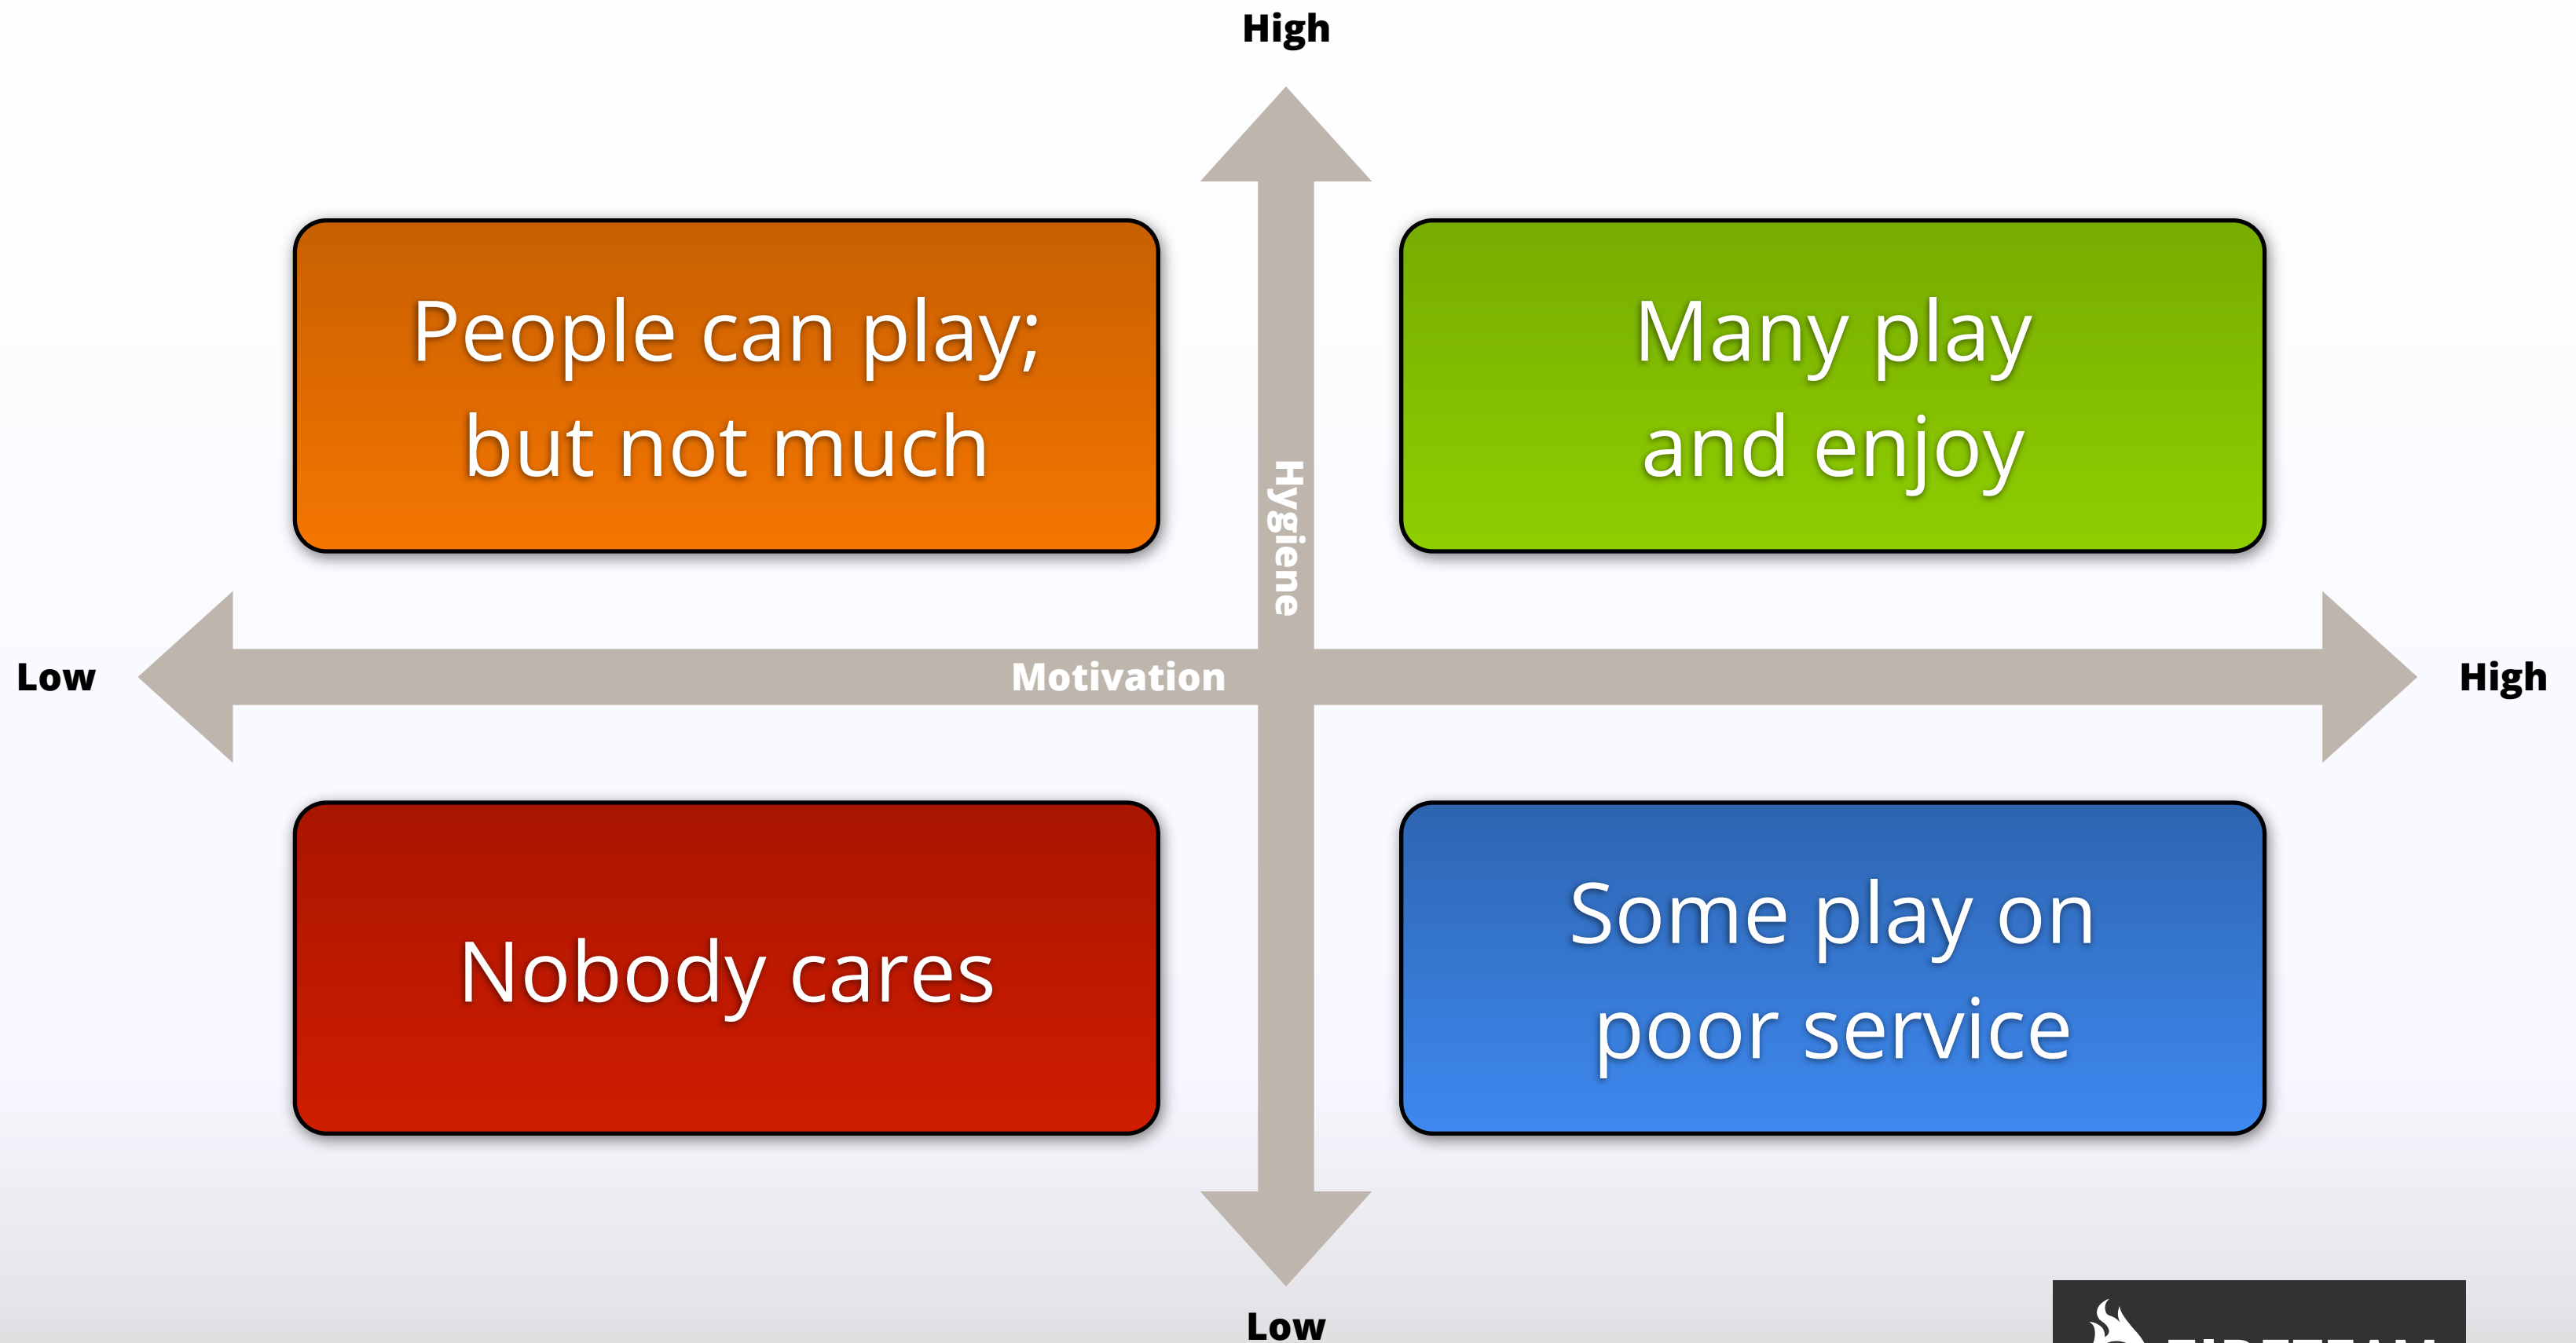

Competitive Space

- ▶ With free to play titles people can just leave at any point
- ▶ You won't be able to retain players unless they are happy
- ▶ Competition can end up with your players

Herzberg applied to Games

Conclusion and Recap

Q&A
